

Culpepper Revived.

BEING AN

532. a

ALMANACK

for the Year of our

BLESSED SAVIOUR'S

Incarnation 1681.

And from the Creation of the World according
to the best of Ecclesiastical History 5630.

Being the first after the Bissextile or Leap-year.

Wherein is briefly shewed, the general State of the Year,
the Solar ingresses, Eclipses, Full Sea at *London Bridge*,
Tides and their returns, the Sun's rising & setting, with
Monthly Observat. & the probable alteration of the air,
Also the certain time of any Mart or Fair in any City or
Town in *England*, with a description of the most emi-
nent Roads therein.

To which is added Rules for Physick and Husbandry with
many other usefull Observations necessary for the com-
pleting such a work.

Calculated and referr'd to the Meridian of the famous
University and Town of *Cambridge*; where the Pole
Arctic is elevated above the Horizon $52^{\circ} 17^m$ but may
serve for any other part of Great Britain.

By *Nathaniel Culpepper* Student in Physick,
and the Cœlestial Science.

Sapiens Dominabitur Astris.

CAMBRIDGE,

Printed by *John Hayes*, Printer to the
University. 1681.

The Julian or old Ac-
count used in England.

1681.

The Gregor. or New
Stile used beyond Sea

Hopefull m.
 deavours as the
 beginning herof
 to compose grand
 differences which
 have for some
 considerable time
 lay under debate.
 — The whole
 month's for the
 most part attend-
 ed with a very
 Benevolent Con-
 figurations, and I
 hope their influ-
 ence may produce
 much union in the
 Days long, i. e.
 spirits of Male-
 contented persons.
 Various Intelli-
 gence arrives,
 and the most part
 thereof not only
 true but pleasing
 in general.
 'Tis we have
 and not Fortune.

February hath xxviii days.

New moon the 8 day, about noon.

First quart, the 15 day, half an hour afternoon.

Full moon the 22 day, at 5 in the morning.

Note that if you subtract the Sun's rising out of 12 hours, the remainder is the time of Sun-setting.

What part the Moon governs in Man's body,
being in any of the twelve Signs.

Twelve Signs do measure Heavens Orbs most duly
Twelve Parts in Man resemble those *Twelve* truly.

Head and Face.

Neck.

Breast.

Bowels.

Secrets.

Knees.

Arms.

Heart.

Reins.

Thighs.

Legs.

Feet.

Thus Man doth bear a part of every Creature;
Be they, or mild, or monstrous mad (by Nature.)

Of the Seven Planets and two Nodes.

♄ Saturn

☉ Sol

☾ Luna

♃ Jupiter

♀ Venus

♈ Dragons Head

♂ Mars

☿ Mercury

♏ Dragons Tail.

Who knows the wondrous workings of these Seven
Wants not an ace of knowing GOD and Heaven.

Of the Five principal Aspects.

♌ Conjunction.

♐ Opposition.

♌ Trine.

* Sextile.

♌ Quartil.

The Trine and Sextile, are sure marks of Love.

The Others, various mischiefs often move.

*Celi enarrant gloriam Dei foris, et opus manuum indicat
expansum eorum. Psal. 19. 1.*

A

Culpepper 1681

From Rye to London 61 miles.

First to Pimwell 15, Tunbridge 12, Chepstow 17, London 17.

Culpepper 1681.

Of the Eclipses this Year 1681.

FOUR times this Year will the Luminaries be Eclipsed, twice the Sun, and as often the Moon.

The first Eclipse of the Sun falls *March* the 10 about 1 in the morning, in the Sign *Aries*, but not visible in our Northern Hemisphere, yet may be seen by our *Antipodes*.

The second Eclipse of the Sun falls *Septemb.* 2 near 20^d of *Virgo*, a small Eclipse about 3 in the morning, and therefore not visible in our Hemisphere.

The first Eclipse of the Moon falls *Febr.* 22, at 46^m past 9 in the morning, the middle time at 11^h 8^m, and the end at 34' afternoon, the whole duration 2^h 48'; but inconspicuous to us, though considerably great in it self, for above half the Moons body will be darkened.

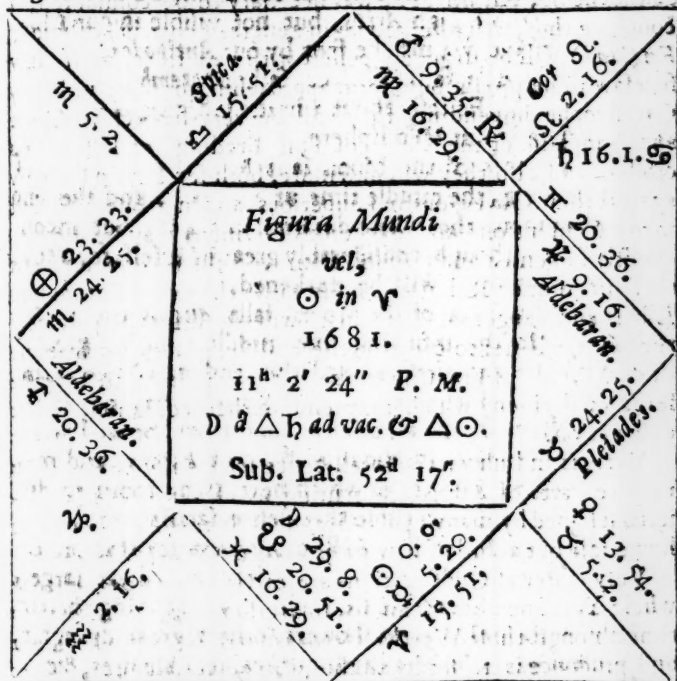

The second Eclipse of the Moon, falls *August* the 19, at 2^h 16' 40" in the morning, the middle time or greatest obscuration at 43' after 3, and the end at 5^h 20' *mane* the digits Eclipsed almost 10, this Eclipse may be visible in our Horizon, if the air be clear, and it will be well worth Observation, it falls in about 6 degr. of *Pisces*, and may have considerable effects, of which here is no room to discourse; therefore I refer those that desire satisfaction in this point to the perusal of M^r *Lilly's Anglicus* for this present Year, and many Others, who doubtless will treat largely thereof: for Eclipses operate from the very beginning thereof, varioussly, some raise great showers, others great droughts, some violent winds, others earth-quakes, terrible fires, &c.

Galapagos 1681.

Of the several Quarters of the Year.

Of the Spring

Which this Year commenceth March the 9^d 11^h 2' 24"
post merid. According to the Caroline Tables, and the
Figure of Heaven presents it self thus.

In regard there is a fixed Sign ascending at the Sun's Ingress into *Aries*, there needs no other Scheme for the Judgements of the whole Year, according to the opinion of some Authors, which I conceive is not sufficient; but one Figure for each Quarter ought to be consulted at least, (*viz.* at the time of the Sun's Ingress into the four Cardinal points) as also Eclipses, Conjunctions and other material Configurations, which happen in the same Year, and all little enough

too, to deduce a Rational Judgement, or Predict the various Contingences of Mundane affairs; for 'tis undoubtedly a very difficult piece of Natural Philosophy, whatever some Persons are pleased to say to the contrary; but this by the way. I shall proceed and give the Reader (in brief) my opinion of general Transactions thus: having consulted not onely the precedent Scheme, but what else was necessary to be considered, I conclude thus, that the People in general (especially those in *England*) will be strangely posselt with vain fears, as if they foresaw some prodigious Storm approaching, or some unhappy Catastrophe impending, they will be very subject to repine and complain of the times, of dull Trading, of losses, and crosses, and also they will murmur, both secretly and openly against their Governors and Superiors, and not onely so, but many Contentions and dangerous Divisions may be too frequently fomented and promoted amongst them, and many of these in point of Religion, and in order thereunto Scandalous Libels and dangerous Pamphlets will be dispersd privately abroad, the better to carry on the evil designs of many busie discontented Agents, who make it their business to sow the seeds of division, which may end in their confusion, if not destruction.

Various and uncertain Intelligence frequently arrives from remote Parts of *Europe*, informing us of very notable projects designed by many of the Grandees thereof: nor are we at home idle but as full of new projects as many other Nations.

Very material Consultations are carried on throughout the whole Year, notable Councils, smart Debates, from time to time amongst those Worthy Heroes of our Nation, whose care and prudence is to settle all things in good Order and beget a right understanding amongst us, in these unsettled times.

We may justly fear some unhappy Contagion or Epidemical Distemper may be predominant amongst us, God preserve us from another Plague and Pestilence, which so lately swept away thousands, I say there is just cause to fear some such thing if we do but narrowly inspect into the Cabinet of Nature: but I shall not be positive in this, nor would I willingly write any thing that might affrighten the People,
but

Culpepper 1681.

but give them timely warning since a cloud seems approaching, if not this very Year, expect it within very few; of which I shall say no more, but *Fiat Dei voluntas*: much more might be said, but being limited, I rather refer you to such Writers that are more copious in their Judgements, and hint at things more particularly, though perhaps not more significantly — and all from the Consideration of the secret operations of Nature, for *Natura nihil agit frustra*, and I think none will deny but it is the onely indisputable Axiom in Philosophy.

Of the Summer.

THE Summer season begins always when the Sun toucheth the first point of *Cancer*, making then Longest dayes and Shortest nights unto us that live on the North side of the *Æquinoctial*, and this Year it begins *June* the 10, 24 min. past 11 at night, those that have a desire may set a Figure for the time and make their conjecture, if they please. This Quarter is naturally hot and dry, therefore those of a Choleric constitution should be most subject to diseases, and those which are Flegmatick more healthfull. Now eat such meats as are easily digested, and rather rise with an appetite then over-burthen the Stomach; for it is now more weak then in the Winter quarter, and therefore slower of digestion, and requires such cold meats which may moisten and mitigate the nature of the season.

Of Autumn.

THE Autumnal *Æquinox* or Harvest Quarter begins always when the Sun toucheth the first point of *Libra*, making then the Days and Nights equal, affording to all parts of the World (except under the Poles) as much shadow as Sun shine; and this Year begins *Septemb.* the 12, 2 hours 52 minutes afternoon. This season is naturally cold and dry, and therefore those of a Sanguine Complexion should enjoy their health well, and the Melancholly Person most subject to diseases. Now you may eat what meat or fruit your Appetite desires, and 'tis also good to Purge and Bleed, and in your Broaths use Cordial powders, which will preserve the Body till the ensuing Spring.

Of Winter.

THE Winter Quarter or Solstice begins always when the Sun having finished his greatest Southern Declination, makes his approach to us again; and at the same time makes the greatest quantity of Shadow, and least portion of Sun-shine unto us, that is, makes the days shortest and the nights the longest to those Inhabitants which live on this Northern side of the *Aequator*, which this Year initiates *Decem.* the 11 near 3 in the morning. The natural temperature of this Quarter is cold and moist, and therefore aged Phlegmatick Constitutions are most subject to distempers, and Youth and Choleric people enjoy their health best. In *Decemb.* Melancholly and Phlegm much abound and encrease in Humane bodies, therefore let all Persons be carefull to keep their heads and bodies as secure from cold as may be, and eat such Broaths or Meats that are of a hot quality.

A brief Explanation of the Moveable Feasts expressed in the Calendar.

THEY are called Moveable Feasts in regard they have no fixed place in the Calendar, as the fixed Feasts and Saints days have, which are always on the same days of the Months: but they are varied every Year according to the diversity of the Moons motion, and therefore fall sometimes sooner, and sometimes later in the Year.

Septuagesima is the Sunday fortnight before Shrove-sunday, so called in Remembrance of the Seventy years that the *Israelites* were under the *Babylonians*.

Sexagesima is the Sunday next before Shrove-sunday.

Quinquagesima is Shrove-sunday, being 50 days, or 7 weeks before *Easter*.

Quadragesima is the first Sunday in Lent, so called in Remembrance of the Fourty days *Moses* fasted when he received the Law, and in respect of our Saviour, fasting 40 days, and is 40 days before the Feast of *Easter*.

Culpepper 1681.

Palm Sunday is always the Sunday before *Easter*, and was Instituted in memory and honor of the triumphant entry of our Saviour into *Jerusalem*, and so called from the Palm branches that the *Hebrews* strewed under His feet, crying, *Hosanna to the Son of David*. Matth. 21. 15.

Maunday Thursday is a Feast in Memory of our Lords Supper when He instituted the Blessed Sacrament of His precious Body and Blood: and is called so *quasi Mandatum*, or *Mandas Thursday* from those words Joh. 13. 34. *Mandatum novum do vobis, &c.* I give you a new Command, (or Mandat) that you love one another; as I have loved you. This is the Thursday before Good Friday.

Good-friday is that Memorable day on which the Great and Glorious Work of our Redemption was consummated by our Saviour *JESUS CHRIST* on His Bloudy Cross between two Thieves at *Jerusalem*.

Easter is the principal Feast of all other, and hath divers Names according to the diversity of Nations; and kept in Memory of our Saviour's Resurrection.

Rogation-Sunday is the Sunday fortnight before Whit-Sunday, so called, *quia nos rogat Ecclesia, &c.* the Church commanded us to continue Fasting, Processions and Prayers against spiritual and temporal Enemies.

Ascension-day vulgarly called *Holy Thursday*, is the Thursday seven night before Whit-sunday, and is a Feast solemniz'd in memory of *Christ's* Glorious Ascension in the sight of His Apostles and Disciples. Acts 1. 9, 10.

Pentecost is *Quinquagesimus*, so called because there is 50 days between *Easter* and Whit-Sunday inclusively, observed in Remembrance of the Law given to *Moses*, and in respect of the Holy Ghost that appeared to the Apostles with Cloven Tongues, and tongues of fire, Acts 2. 1. *Pentecost* in *Greek* signifies Fiftieth.

Trinity Sunday is the next Sunday after Whit-sunday.

Corpus Christi is the Thursday seven night after Whit-sunday.

Advent Sunday is the Sunday before *S^t Barbara*, which is always the 4 of *December*.

Culpepper 1681.

The four *Ember Weeks* (in *Latine*, *quatuor anni tempora*) are times of publick Prayer and of Fasting, partly Instituted for the successfull Ordination of the Priests and Ministers of the Church, and partly to beg and render Thanks to God for the Blessings and Fruits of the Earth. They contain the *Wednesday*, *Friday*, and *Saturday* next after *Ash-wednesday*, *Whit-sunday*, *Holy Cross*, and *Lucies day*, according to the old Verses:

*Post Cineres Pentec, post Crucem, postque Luciam
Mercurii, Veneris, Sabao, jejunia fient.*

Excellent Notes of Husbandry and Gardening for each Month in the Year.

January.

IN this Month cut down Timber (and it shall not cleave nor be eaten with Worms: in the last quarter of the Moon set or sow Kernels and Bay-trees, Primet and Fox: set Quick-sets, Rose-trees, Peaches, Philberts & Plumb-trees, if the frosts be not too hard, prune and lop them: before full Moon sow and set Beans and Pease, and dung Land: in the last quarter geld Cattle to rear, fallow Land for Wheat and Rye, trench Gardens with dung, and remove Bees: and for your own health keep your body warm, let good and wholsom Diet be your Physician, moderate exercise and labor your sawce to cause Appetite,

February.

Sow all sorts of Pease, and other Pulse: sow Mustard-seed, cast up Dikes, set and plant Vines, Hops, Goosberries, and any Fruit that grows upon Bushes: prune and trim all sorts of Fruit-trees from Moss, Canker, and all superfluous branches, graff in the latter end of the Month, sow Onions in cold stiff Land, take heed of cold, forbear Phlegmatick meats.

March.

In the new of the Moon (the wind any way but South or West) graff Pears, Wargens or Apple-trees, make an end of sowing all manner of Pulse, and begin to sow Oates, Barly, Parsnips, Onions, Carrots, Cucumbers, Melons, and all kind of Pot-herbs, slip Artichokes and Sage, geld Lambs, let Blood according to strength and necessity, the Sign and weather being also fit (but repair to the learned Physician) look what cannot be cured in the Spring by Physick, will hardly be cured all the Year after.

April.

Culpepper 1681.

April.

Sow Barly, Hemp and Flax, Pole Hops, set and sow all kind of Garden Herbs, open Hives, and let Bees labour for their living, let Tanners now provide them with Bark, and all good Housewives look to their Daries, bleed and purge with advice: those that are troubled with Aches or the Gout, let them go to the Bath in this or the three following Months.

May.

Sow Barly on all light Lands and bearing Grounds, and Hemp and Flax, and all manner of fine Seeds and Herbs, take Lambs from their Dams, stir Land for Wheat and Rye, leave lopping of Trees, teach Hops to climb, but cut off the superfluous Branches: rise early, walk the Fields, especially by running Streams: Sage and sweet Butter is now an excellent Break-fast; Sage and clarified Whey, as also Scurvy Grass Ale, and Wormwood Beer, are wholesome Drinks to be drunk fasting.

June.

Sheer Sheep, bring home Fewel, weed Corn and Gardens, set Rose-mary, Carnations and Gilly flowers; sow Lettice and Radish-seed three or four days after the Full, for then they will not run to seed, make Hay, carry Sand, Lime, Marle and manure of what kind soever, refitting your Land, cut neither Hedge nor Tree in this and the two next Months, beware of great thirst, use thin and light Diet, moderate exercise, and chaste thoughts.

July.

Make your Hay and house it while it's fair weather, pull Hemp that is ripe, gather Garden Beans, get Rue and Wormwood, and Gaul to strow on your Floors, to destroy Moths and Fleas, fence your Coppes, use moderate Diet, take heed of great thirst, for nothing bringeth the Pétilence or pestilent Diseases sooner than extream thirst, and fervent heats, and cold taken suddenly upon them, take no Physick, bleed not but upon violent occasions.

August.

Follow close your Corn Harvest, sow winter herbs in the new of the Moon, gather Garden-seeds, mow Barly and Oats, gather your Summer-fruits, refrain from sleeping in the day time after Meat, avoid riot and excess.

September.

In the beginning of this Month and end of the former, gather Hops when they wax brown, the weather being fair and no dew on the ground, kill Bees, make Verjuice, sow Wheat and Rye, remove and set all slips of Flowers between the two Lady days, put Swine to mast, remove Trees every new Moon from September till February, especially in the new of the Moon, the weather fair and warm, wind South or West, use Physick moderately, forbear Fruits too pleasant or rotten, shun riot and excess of Diet.

October.

Calpepper 1681.

October.

Sow Wheat and Rye, the sooner the better, for fear of Frost, set Acorns and Nuts, gather winter Fruit, the weather dry, in the afternoon, and in the wane of the Moon, cut Root-trees if you desire to have store of Roses, do this once in two years, refuse not any needfull Physick at the hands of the Learned, and use all moderate Sports to revive the vital Spirits.

November.

Make Malt, kill Hogs, trench Gardens with dung, set Crab-tree. Rocks, sow Wheat and Rye in exceeding hot sandy Grounds, cut down Timber for Plows, Carts, and other Implements for Husbandry, use wholesome Meats and Drink, with good exercise to preserve health.

December.

In this and the next Month cut down Timber, in the last quarter of the Moon uncover the Roots of Fruit-trees: set Beans and Pease, cover all the best Flowers and Herbs from Frosts and Storms with old rotten Horse-dung, look well to your Cattle, water and keep moist your Meadows, let Horses blood, and drink good Wine and Strong Drink, keep thy Body warm clad, thy House warm and dry, cast all care from you, and relieve those that are in want with thy Charity: Thus have I ended these Observations which are laid down for thy advantage, make good use of them, and give God the Glory.

Vale.

There is lately published *Theſaurus Linguae Sanctae Reſeratus*, &c. being a Concordantial Hebrew Lexicon, or Dictionary, in which all the Hebrew Lexicons are ſuccinctly comprehended, and the whole Hebrew Concordance of every Word of the Hebrew Bible grammatically reſolved, &c. By William Robertson A. M. To be ſold by G. Sanbridge at the Bible on Ludgate-hill, London.
